

Planting the Potato

Potatoes grow from seed planted in the ground.

Can you name three other vegetables that grow in the ground?

The Potato Plant

Colour up the potato plant. It takes up to four times your summer holiday for the plant to grow and be ready to harvest. Can you name three products which potatoes are used to make?

Harvesting the Potatoes

Potatoes are harvested from May through to November. Once harvested they are stored and then transported to the shops or factories to make things like oven chips and crisps. Name five places where you can buy potatoes?
